PROGRAM

Jennifer Chang
Senior Consultant
SysLogic, Inc

With cybercriminals more and more prevalent, how can you create secure and unique passwords for every website you visit? A password manager is a tool that stores all your passwords and other sensitive information in one place only accessible with the master password.

Join us to discuss: What is a Password Manager? What Are the Benefits of Using a Password Manager? Are Password Managers Safe? Do Password Managers Generate Strong Passwords? What are some top rated/recommended password managers?

Jennifer Chang is a Senior Consultant and Security Analyst at SysLogic. She works the Cybersecurity team as they work with clients on software security best practices. Projects include (but are not limited to) pentesting, security assessments, and security training.
